

WHITE LUBE

General purpose grease for pipe threads and joints. Vegetal-based, biodegradable, product formulated with nontoxic solid lubricant for environmentally sensitive areas where petrochemical greases cannot be used.

Description - Greenish paste; density 1.01 to 1.03 g/cm³ at 25°C; pH not applicable; solubility in water: <0,01% ; drop point 80°C; decomposition 120°C; temperature limit 210°C; auto-ignition temperature: 400°C.

Main advantages:

- Facilitates pipe threading and unthreading;
- Increased life cycle of the pipe;
- Fast application during tool maneuvering;
- Strong adhesiveness to the thread surface even when wet;
- Environmentally friendly;
- Biodegradable and harmless to the environment.

How to use - Apply the product on the threads during tool maneuvering and coupling of pipes in the perforation process.

Dosage - 5 to 10 g per thread (apply using brush).

Toxicity - Nontoxic and biodegradable. Avoid contact with the eyes and mucous.

Handling - The use of individual protection equipment (IPE: goggles, masks, rubber gloves) is recommended as provided in the applicable hygiene and labor safety legislation.

Packaging - WHITE LUBE comes in suitable plastic buckets containing 4 kg (8.9 lb).

Storing - Keep in a roofed, dry, ventilated place, protected from direct sunlight.
